Y6 Health Education
'Living and Growing'

Dear Parents & Carers,

As part of our Y6 curriculum in Personal, Social and Health Education (PSHE), we will be learning about how the body changes whilst growing up. This will build on the work children completed in Y5. The objective of the upcoming lesson will be to prepare children for this change as they grow into young adults.

Due to the sensitivity of the subject, our school nursing team will be leading the sessions on **Tuesday 27th February**. Y6 teachers will also be present to support pupils and the nurses have visited today to introduce themselves and provide a brief recap of the work completed in Y5.

As part of the upcoming session, children will be watching a short, age appropriate film that explains how babies are made and born. Although there will also be time for questions and answers within the lesson, they may have further questions that they wish to discuss with you at home.

If you have any questions regarding the session content or delivery, please come and ask a member of our team- we will do our very best to help!

Our thanks in anticipation of your support.

Yours sincerely,

Mrs Walker, Mrs Griffiths & Mrs Cobb

The Y6 Team
